Pally – A Discord Bot for Better Social Gameplay

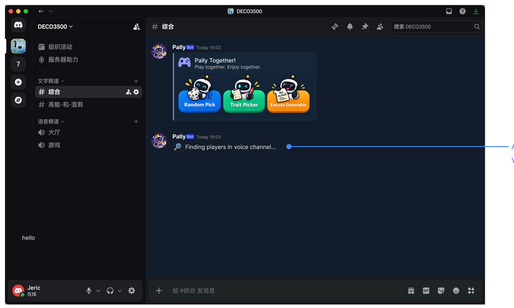

❶ Main Control Entry

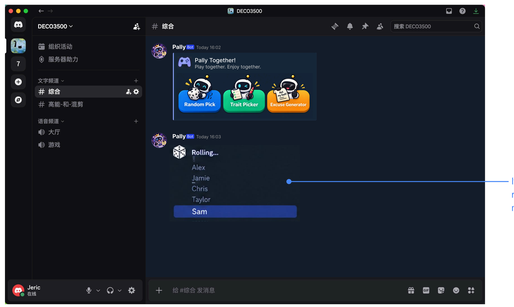

When the bot is invited to this channel, it will automatically send a message containing a panel with three tools. Clicking each tool will trigger the related feature.

Users can also use “/tools” to bring up the Pally tool panel

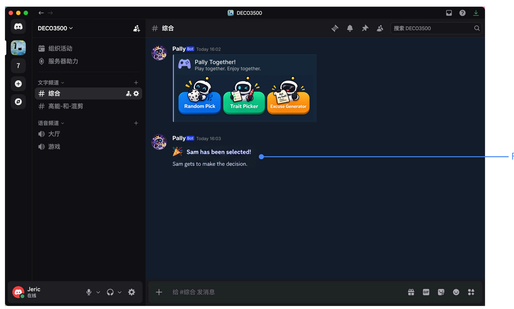

❷ Random Pick

After clicking “Random Pick”, the prompt appears. It is visible to everyone in this server.

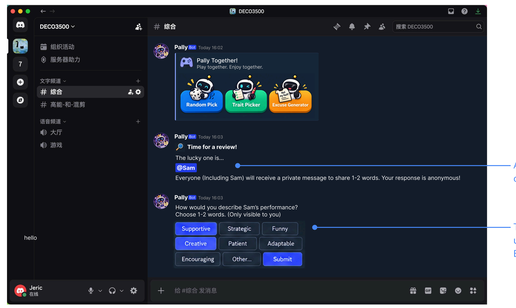

It then turns into a rolling animation and stops on the result after 3 seconds. The name list is pulled from members in the voice channel.

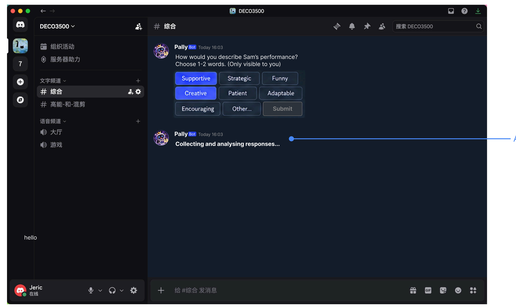

Finally, the name and its description text will be displayed.

❷ Random Pick

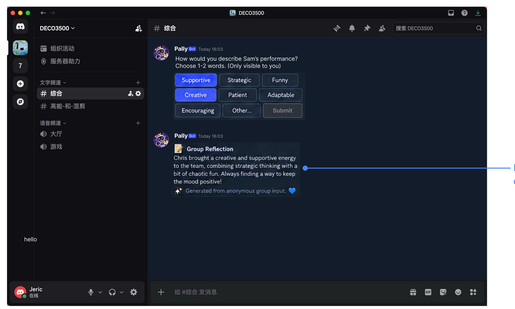

After clicking “Trait Picker”, the bot will randomly choose one user in the voice channel and introduce the rules.

Then a private message will pop up on the screen of every user in the voice channel for them to make their selection. Each message contains different words.

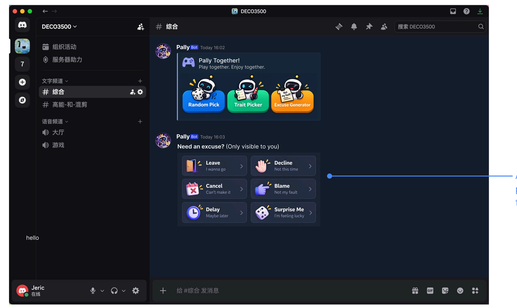

After submitting the words, the text prompt will show up.

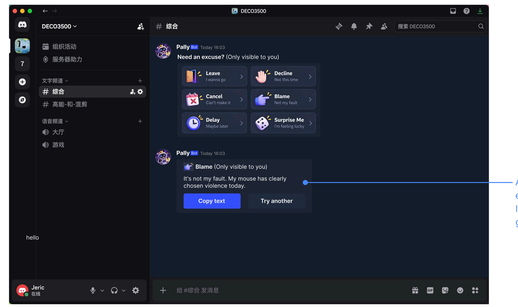

Finally, an AI-edited summary will be displayed to everyone.

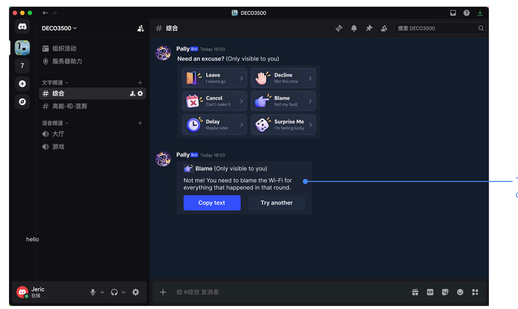

❸ Excuse Generator

After clicking “Excuse Generator”, the bot will pop up a private message with multiple categories for you to select from.

After selecting a specific category, the bot generates an excuse text that users can copy.
If users dislike this excuse, they can click “Try another” to generate a new one.

The old excuse will disappear and be replaced by the new one.
